EDUCATION

2020-2024
University of Auckland

- Software Engineering
- (First Class Honours)

2023
Korea University

- Computer Science and Engineering
- Overseas Study Abroad

EXTRACURRICULAR

University of Auckland

- Part II Assistance Centre Mentor
- 360 Digital Exchange Ambassador
- Web Development Consulting Club UX/UI Designer
- Software Engineering Student Association Member
- Auckland Korean Student Association Member
- U21 Global Researcher

MILITARY SERVICE

Republic of Korea Army

Sergeant | 02/2025 – 08/2026

PROFILE

As a graduate software engineer, I excelled in dynamic environments, consistently pursuing new skills. My free time is dedicated to programming projects, showcasing my creativity and innovative approach. I prioritise effective teamwork, emphasising active communication and mutual reflection to foster collaboration. I am proficient in independent and team-based work and bring a strong drive for continual improvement to any project.

WORK EXPERIENCE

EY (Ernst & Young)
Technology Consultant Intern (AI & Data)
11/2023 - 02/2024

- Participated in an infrastructure modernization project for utility industry clients, performing UAT for Power BI dashboards and validating data quality across business systems.
- Created over 9 business reports and conducted more than 5 functional tests using Microsoft Excel, Power BI, and project documentation.
- Supported the development of a PowerApps-based workflow management prototype, implementing CRUD functions, SharePoint integration, and CSV bulk upload features.
- Assisted in building Power Automate workflows to improve operational efficiency and support digital transformation initiatives.
- Contributed to establishing a Single Source of Truth by integrating distributed financial and operational data into a centralized management system.

RisosEnterprises Ltd
Software Engineering Intern (Developer)
12/2022 - 02/2023

- Migrated MATLAB-based image processing algorithms to Python and optimized data structures and algorithms, achieving an 8–10× improvement in processing speed.
- Converted NumPy-based code to CuPy and implemented GPU parallel processing in Google Colab, improving large-scale image processing performance.
- Developed technical documentation, experimental reports, and development guides to facilitate knowledge transfer and support future development.
- Collaborated on the development of the Waicorder water quality analysis solution through performance optimization and algorithm enhancement.

AWARDS & CERTIFICATION

University of Auckland

- Commissioner Award from the Ministry of Korean Military Admission (2025)
- University of Auckland Partnership Appeal Award (2024)
- Outstanding Achiever for Cyber Security Course (2023)
- Faculty of Engineering Student Support Award (2022, 2024)
- 360 International Exchange Award (2022)
