EDUCATION

University of Auckland — **Auckland, New Zealand**
Software Engineering (First Class Honours) | GPA 7.43 — *Graduated: Dec 2024*

Korea University — **Seoul, South Korea**
Computer Science and Engineering (Exchange Study) — *Feb 2023 – July 2023*

WORK EXPERIENCE

EY — **Auckland, New Zealand**
Technology Consultant Intern (AI & Data) — *Nov 2023 – Feb 2024*

- Participated in an infrastructure modernisation project for utility industry clients, performing UAT for Power BI dashboards and validating data quality across business systems.
- Created over 9 business reports and conducted more than 5 functional tests using Microsoft Excel, Power BI, and project documentation.
- Supported the development of a PowerApps-based workflow management prototype, implementing CRUD functions, SharePoint integration, and CSV bulk upload features.
- Assisted in building Power Automate workflows to improve operational efficiency and support digital transformation initiatives.
- Contributed to establishing a Single Source of Truth by integrating distributed financial and operational data into a centralised management system.

RisosEnterprises Ltd — **Auckland, New Zealand**
Software Developer (Engineering) — *Dec 2022 – Feb 2023*

- Migrated MATLAB-based image processing algorithms to Python and optimised data structures and algorithms, achieving an 8-10x improvement in processing speed.
- Converted NumPy-based code to CuPy and implemented GPU parallel processing in Google Colab, improving large-scale image processing performance.
- Developed technical documentation, experimental reports, and development guides to facilitate knowledge transfer and support future development.
- Collaborated on the development of the Waicorder water quality analysis solution through performance optimisation and algorithm enhancement.

PROJECTS

Smart Inventory Management System (Honours Thesis) — **University of Auckland**
iOS Developer & Data Analyst (2-person team) — *Jul 2024 – Nov 2024*

- Developed a BLE/UWB-based indoor asset tracking system to locate inventory items within indoor environments.
- Built the iOS application in Swift (Xcode) and integrated Firebase Firestore for storing and synchronising location data.
- Designed experiments and analysed RSSI signal data, applying regression analysis (R^2) to evaluate positioning accuracy.

MoodMind – Emotion-Aware Chatbot (CS731) — **University of Auckland**
Team Leader (3-person team) — *Aug 2024 – Oct 2024*

- Led a 3-person team develop an emotion-recognition chatbot powered by the ChatGPT-4o mini-API.
- Developed the chatbot response-generation module, tailoring replies to the user's detected emotional state.
- Managed the project schedule and led system integration across the team's components.

MILITARY SERVICE

Republic of Korea Army — **Yeoncheon, South Korea**
Sergeant (5th Infantry Division) — *Feb 2025 – Aug 2026*

- Volunteered for active duty despite being eligible for exemption as an overseas resident and completed the full term of service.

EXTRACURRICULAR

University of Auckland — **Auckland, New Zealand**
Part II Assistance Centre Mentor — *Jul 2024 – Nov 2024*

- Guided Part II Software Engineering students through coursework, providing academic consultation and mentorship to support their academic performance and professional development.

University of Auckland — **Auckland, New Zealand**
360 Digital Exchange Ambassador — *Feb 2023 – Jul 2023*

- Supported incoming international exchange students with orientation sessions, academic-system guidance, and general enquiries as part of the university international exchange program.

University of Auckland — **Auckland, New Zealand**
UX/UI Designer — *Apr 2022 – Oct 2022*

- Designed UX/UI concepts for client web development projects as part of a student-run consulting club.

AWARDS

- Commissioner's Award, Military Manpower Administration of Korea (2025)
- University of Auckland Partnership Appeal Award (2024)
- Outstanding Achiever, Cyber Security Course (2023)
- Faculty of Engineering Student Support Award (2022, 2024)
- 360 International Exchange Award (2022)

ADDITIONAL INFORMATION

Technical Skills
- Programming: Python
- Tools & Platforms: Firebase Firestore, PowerApps, Power Automate, Microsoft Excel, Git/GitHub

Languages
- Korean (Native), English (Native)

Citizenship
- Korean Citizen, New Zealand Permanent Resident
